

Watch *your mailbox*

In early 2000, the contractor for the Mercer Street Tunnel will be on board and ready with a construction schedule. (Tunnel construction will begin at the site of the Elliott West CSO Control Facility.)

Once the contractor is chosen, a public meeting will be held to discuss the:

1. construction schedule,
2. anticipated construction impacts on Elliott Avenue West,
3. final design for the Control Facility at 545 Elliott Avenue West,
4. detour plan and construction impacts in Myrtle Edwards and Elliott Bay Parks.

Watch for notices in local newspapers and in your mailbox!

Where do I get more information?

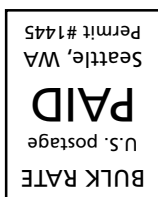

Do you:

- Have questions about the project?
- Have concerns about how it will impact your business or property?
- Need information about construction scheduling?
- Wish to receive copies of the earlier newsletters?

Watch for a sign!

You may have already seen one – and there are more to follow. Interpretive signs about the project are sprouting up along the route. You may have noticed the first signs in Myrtle Edwards Park and Elliott Bay Park. Others are to follow – at the site of the Control Facility and in the south Lake Union area. We hope they answer your questions. If not – give us a buzz!

For information or assistance, please call Kate Boris-Brown at Norton-Arnold & Janeway: 206/269-0229 or check the project's web site at: www.metrokc.gov/dennyway. Watch for the construction hotline number beginning in 2000.
